EDUCATION

UNIVERSITY OF REGINA

Regina, SK

Bachelor of Science

Major in Computer Science

PROJECTS

Locked-In Habit Tracker (Next.js, React, MongoDB, Tailwind CSS)

Sept 2024 – Oct 2024

- Built a habit tracking web app that helps users visualize daily habits using a dynamic heatmap.
- Integrated MongoDB for managing user data and tracking habit completion history
- Designed a responsive UI with React and Tailwind CSS; deployed via Vercel for performance and scalability.

WORK EXPERIENCE

ROCHE

Remote/Mississauga ON

Biostatistics Intern

May 2020 – Aug 2020

- Quickly gained proficiency in R, contributing to a data analysis tool for biomarker scientists to explore and analyze internal biomarker data.
- Debugged code and implemented functionality allowing users to upload custom gene signatures for analysis.
- Collaborated with a team of five developers, utilizing GitHub for version control and effective project coordination.

JJJ PAINTING

Regina, SK

Freelance Web Developer

Jan 2024 – July 2024

- Designed and developed a visually appealing and fully functional website for JJJ Painting using React and Tailwind, transforming their online presence
- Successfully facilitated five sales within the first few months post-launch, significantly boosting revenue.
- Improved search engine visibility through basic SEO practices.

STAPLES

Regina, SK

Sales Associate

Jul 2021 – Feb 2023

- Assisted customers with technical product inquiries, developing strong communication and problem-solving skills.
- Worked closely with the team to manage inventory and ensure timely stock updates, improving attention to detail and organizational abilities.
- Trained team members on store systems and daily operations

CALGARY PUBLIC LIBRARY

Calgary, AB

Technology Volunteer

March 2026 - Present

- Assist community members with technology questions, troubleshoot software and connectivity issues, and support staff with general tech issues
